ESTIMATION AND SAP SERVICES

Build Aviator offers a range of services and support at each stage of the build process, from product specifications, to assisting with a smooth process through building control sign off.

ONLINE QUOTING SERVICE

Price up your latest project with over 5,000 products online, allowing you to view stock availability, view pricing and create a quote.

CLICK & COLLECT SERVICE

Price your project online and avail of same day collection from your local branch or arrange delivery direct to site.

ONSITE SURVEYS

When you place a washroom order with us, we do the rest - including a site visit to take measurements, ensuring the perfect fit.

CUTTING SERVICE

With a range of woodworking machinery, we can offer a timber and panel product cutting service if required.

BRICK MATCHING SERVICE

We take the hassle out of matching your bricks. Simply send us your brick photos or arrange a site visit, tell us the size you need and our experts will match them free of charge.

LOCAL MANUFACTURE

Our doors and washrooms products are carefully manufactured locally by our experienced staff at our impressive Springfield Road, Belfast production facility.

CAD DRAWING

Technical drawings can be provided for clarity to ensure your washroom project runs smoothly and on schedule.

QUALITY CONTROL

Quality control is a crucial requirement for fire certification, and we apply the same rigorous standards across our full range of door and washroom products.

FIRE DOOR CERTIFICATION

We are fully 3rd party certified, independently audited, and have carried out physical fire tests giving you full confidence in our fire doors and frames.

WE HELP YOU SEE THE BIG PICTURE,

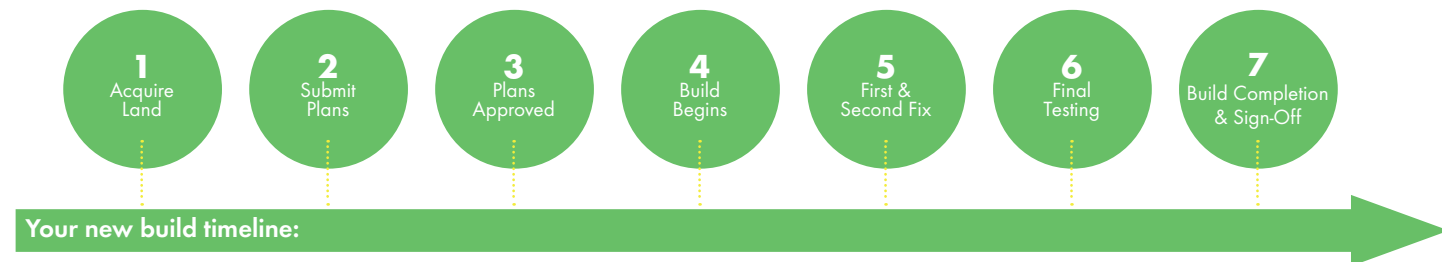

Build Aviator helps you lay the foundations for building compliance, so why not compliment your JP Corry account with our Build Aviator service? Through its services, guidance and support, Build Aviator helps you to save time, build intelligently and to a specification that works for you, with quality products that are locally available.

Get a quote today by uploading your plans to www.jpccorrry.com/build-aviator/

FIND OUT MORE

Supporting you at every build stage...

The perfect solution whatever the scale of project.

Estimating Service

Our quantity take-off service is the most effective and comprehensive estimating service available and provides an accurate and efficient estimate of materials, labour and tool hire required using materials sourced from JP Corry.

Benefits:

- Fast and efficient turn around
- Project manage more efficiently
- Helps with budgeting and mortgages
- Know your costs
- Comprehensive reports
- Suitable for Architects, Builders, Contractors and Self-Builders

SAP Service

The Standard Assessment Procedure (SAP) is the system used for measuring the energy performance of a dwelling to ensure it meets Government regulations. It evaluates a home's energy performance and is a requirement for building regulations for newly built properties. It's crucial to any new build.

How can Build Aviator's service help me?

We work with you by taking your design, preferred building method and match it with products in line with building regulations to allow you to get ahead with your products and get on with the build - whilst also reducing the risk of non-compliance and ensuring you know right from design stage what products you require.

Benefits:

- A simple to use service
- SAP service and estimating service correspond to one another (your estimate is generated using product specified in the SAP report - ensuring you price accurately and use the required materials to meet compliance)

AND FOCUS ON THE DETAILS TOO

From concept to completion, we're your Self-Build Specialist

With JP Corry as your self-build partner you can expect more than just quality building materials and tools. We can offer you the full package:

- Extensive product range – our range of products goes further than just bricks and timber - from foundations to finish. We can also offer everything from sustainable energy solutions to the latest landscaping products. Plus, we can access an even wider product range through our sister companies – all of whom are market leaders in their specialist fields.
- Dedicated support from your local branch – providing you with a committed sales representative who will be with you every step of the way.
- Flexible credit terms to help you manage your budget.
- Account management online – helping you to manage your pricing, view your credit terms online and the ability to create quotes at a time that suits you.

AND HELPING YOUR PLANS TAKE SHAPE

CASE STUDY 1 HELEN'S WOOD

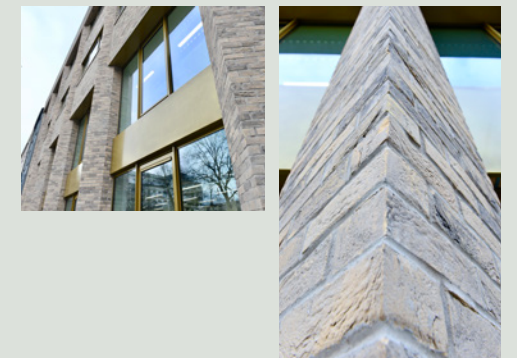

JP Corry and Lagan Homes worked closely to provide a range of building materials for 'Helens Wood' a unique collection of detached and semi-detached homes located on the outskirts of Bangor on the Rathgael Road.

JP Corry provided a range of building materials from external fascia and guttering, roofing felt, garden edge kerbs and finished in Weinerberger Washington Red Multi Brick to create a polished exterior. Internally the project was finished to a high standard with W Howard skirting and architrave and Isover loft and acoustic insulation.

CASE STUDY 2 THE KELVIN

The Kelvin is a Category A office refurbishment of an existing five storey office building in the City Centre of Belfast along College Square East and Wellington Street.

JP Corry worked closely with contractor MSM and Architect RMI Architects to find the perfect brick that would retain the characteristic features of the existing buildings, with a final choice of Vandersanden Corum which compliments the overall style and complexity of its surroundings.

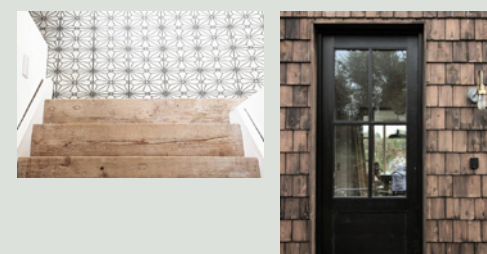

CASE STUDY 3 THE HOUSE IN THE HOLLOW

This timber clad self-build project was completed by Gareth Boyd, who worked with a contractor to utilise the Build Aviator Estimation service to manage his build from start to finish.

The end result is a charming, rustic home full of Scandinavian design statements, with a specific design in mind. JP Corry aimed to help Gareth achieve his design vision and provided high specification materials such as Kingspan TF70, Brett Martin drainage and treated batons to create this charming and rustic home. Cedar cladding was supplied and hand burnt to add a unique finish to the exterior of the project.

A self-build filled with natural and subtle materials from the timber floor to the redwood skirting and architrave.

OUR BUSINESS HAS GROWN AROUND HELPING YOU BUILD YOUR DREAMS

Timber

We have a huge range of softwoods, hardwoods, carcassing, engineered timber, roof trusses, plywood, OSB, MDF, chipboard, fibreboard and laminates in stock. We can also source specialist timber for internal and external cladding.

— Timber —

AT JP CORRY we take timber seriously. As timber merchants, we pride ourselves on offering high-quality, sustainably sourced timber. Our timber supply range includes MDF sheets, plywood, cladding and treated timber. We're committed to responsible timber procurement and provide Chain of Custody Certification for our timber and wood-based products.

The timber market is complex and ever-changing. Global supply chains, dynamic regulatory demands, questions around sustainability and an ever increasing amount of choice means our customers need help to find the right timber solution for their projects and clients.

- Garden Furniture

— Insulation and Plasterboard —

INSULATION is an integral aspect of traditional and contemporary building and construction, keeping your home warmer for longer with our extensive and professional range of Insulation. From loft and roof insulation to cavity wall and pipe insulation. Insulation will provide heating efficiency in colder months but help maintain cooler temperatures when required.

Types of Insulation we offer are:

GLASS WOOL INSULATION – Glass wool, also known as fibreglass, is considered to be one of the most effective and environmentally friendly insulation products available. The excellent thermal properties help you save energy and lower your environmental impact. The porous, elastic structure provides effective acoustic attenuation at operating temperatures up to 300°C.

ROCK MINERAL WOOL INSULATION – Rock mineral wool insulation is a more solid material than glass wool so is suitable for situations where the material may be compacted. Mineral wool comes in rolls and slabs in varying thicknesses and widths. Rock mineral wool is a very effective fire safety measure as it is resilient to heat and fire.

RIGID SHEET INSULATION – Sheet insulation can be used in a variety of different applications:

- Lofts/attics
- Pitch and flat roofs
- Floors
- Internal and external walls
- Effective sheet insulation solutions with low U-values

PLASTERBOARD – a widely used material for walls and ceilings, typically made from gypsum. Utilising high proportions of recycled paper and water with raw gypsum supports a move towards a more circular economy.

We offer a full range of plasterboard: plain, moisture resistant, fire resistant and acoustic - along with other sheet materials that either use a high proportion of recycled gypsum or have a reduced amount of gypsum used in the product.

— Brick, Stone and Cladding —

BRICK is one of the first sustainable building products and has been for over 10,000 years! Bricks can be recycled, reused and repurposed indefinitely and require very little maintenance so there is practically no waste and contribution to landfill is dramatically reduced.

EXTERIOR WALL CLADDING provides as extra layer to your project and comes in a variety of different finishes.

A wide range of materials can be used for cladding such as wood, brick, metal, vinyl and also composite materials that may include aluminium, cement and recycled polystyrene, wheat or rice straw fibres and many others.

Cladding is widely used to provide increased weather resistance, thermal insulation, noise control and fire protection. It also improves the overall appearance of the building.

Landscaping

Your garden is possibly the largest space you will have to consider for your project – it can add as much value to your property as a new bathroom or kitchen and it sets the scene for your build and adds vital ‘kerb appeal’.

Successful gardens require careful planning – your first step is to think about how you are going to use your space – do you need a play area for children? Do you want an entertainment or dining area?

We’re here to help you get everything you need regardless of the size of space you are working with. You will find essential garden maintenance supplies from paving, fencing to decking and artificial grass, perfect for bringing that garden inspiration to life.

Our range of landscaping and gardening products can help you build anything from a simple idea in a small space to more involved creations by ambitious garden designers.

JP Corry’s excellent range of landscaping supplies helps make outdoor improvement jobs a breeze. Be sure to browse our top quality materials such as panels, sleepers and everything that goes along with.

Decking, Patios and Driveways

DECKING AND PATIOS – Decking and patio areas are useful features that make your garden an area for outdoor living. To create the perfect outdoor dining space, consider factors such as wind direction and sun spots and plan additional heating and lighting accordingly, allowing you to enjoy your outdoor space as long as our weather permits.

We supply a range of softwood, hardwood and composite decking, as well as a massive range of patio material including sandstone, slate, granite and concrete plus a range of features and accessories to make your decking dream and patio plan come to life!

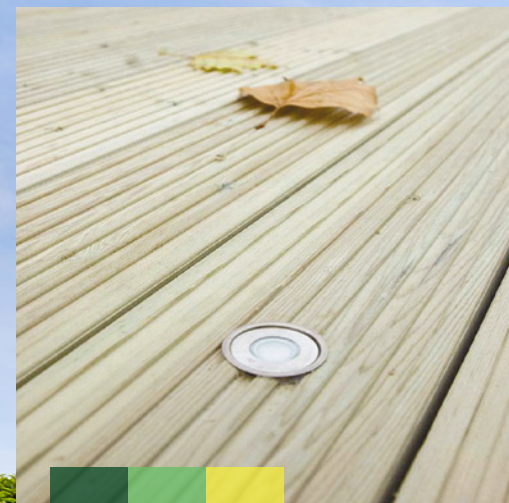

DRIVEWAYS – Your driveway can have a huge impact on the front of your property. It provides the perfect welcome to your home but also needs to withstand the busy lifestyles of today.

At JP Corry we offer an extensive range of stylish and durable paving in many styles, colours and sizes. We have distinctive features such as circles and octants, allowing you to create a more individual look. Our selection of high performance walling and copings will frame the front of your build perfectly. We also offer a range of porous paving that meets the latest legislation of impermeable materials.

You can check out landscaping materials in any of our branches or visit the website jpccorrry.com for the complete range.
